ARTICLES

Shin-ichi Suzuki, Kohei Takahashi, Toru Okuda, and Saburo Komatsubara Selective isolation of *Actinobispora* on gellan gum plates 1

Gandhi Rádis-Baptista, David N. Urquizo Valdivia, and José Abrahão-Neto Fructose 2,6-bisphosphate biosynthesis and regulation of carbohydrate metabolism in *Aspergillus oryzae* 6

Gudrun Kirchhof, J. Ivo Baldani, Veronica M. Reis, and Anton Hartmann Molecular assay to identify *Acetobacter diazotrophicus* and detect its occurrence in plant tissues 12

Maryvonne Charrier, Yannick Combet-Blanc, and Bernard Ollivier Bacterial flora in the gut of *Helix aspersa* (Gastropoda Pulmonata): evidence for a permanent population with a dominant homolactic intestinal bacterium, *Enterococcus casseliflavus* 20

John Devenish, Carlton Gyles, and Jonathan LaMarre Binding of *Escherichia coli* verotoxins to cell surface protein on wild-type and globotriaosylceramide-deficient Vero cells 28

Yu-Li Tsai and Stephen L. Parker Quantification of poliovirus in seawater and sewage by competitive reverse transcriptase – polymerase chain reaction 35

Paul Hein, Justin Powlowski, Diane Barriault, Yves Hurtubise, Darakshsan Ahmad, and Michel Sylvestre Biphenyl-associated *meta*-cleavage dioxygenases from *Comamonas testosteroni* B-356 42

M.P. McCann, H.T. Solimeo, F. Cusick, Jr., B. Panunti, and C. McCullen Developmentally regulated protein synthesis during intraperiplasmic growth of *Bdellovibrio bacteriovorus* 109J 50

Francis F. Arhin, France Moreau, James W. Coulton, and Elaine L. Mills Sequencing of *porA* from clinical isolates of *Neisseria meningitidis* defines a subtyping scheme and its genetic regulation 56

Hao Xu, Marilyn Griffith, Cheryl L. Patten, and Bernard R. Glick Isolation and characterization of an antifreeze protein with ice nucleation activity from the plant growth promoting rhizobacterium *Pseudomonas putida* GR12-2 64

Elias K. Manavathu, S.C. Vashishtha, George J. Alangaden, and Jonathan R. Dimmock In vitro antifungal activity of some Mannich bases of conjugated styryl ketones 74

Seanna L. Annis and Daniel G. Panaccione Presence of peptide synthetase gene transcripts and accumulation of ergopeptines in *Claviceps purpurea* and *Neotyphodium coenophialum* 80

NOTES

Patrick S. Alban and Noel R. Krieg A hydrogen peroxide resistant mutant of *Spirillum volutans* has NADH peroxidase activity but no increased oxygen tolerance 87

G. Scott Jenkins, Mark S. Chandler, and Pamela S. Fink Functional characterization of the *Haemophilus influenzae* 4.5S RNA 91

February / février

ARTICLES

M.J. Garabito, M.C. Márquez, and A. Ventosa Halotolerant *Bacillus* diversity in hypersaline environments 95

N. Borrell, M.J. Figueras, and J. Guarro Phenotypic identification of *Aeromonas* genomospecies from clinical and environmental sources 103

Rajam Rajendran and Yoshiyuki Ohta Binding of heterocyclic amines by lactic acid bacteria from miso, a fermented Japanese food 109

Eva Stratilová, Emília Breierová, Renáta Vadkertiová, Eva Machová, Anna Malovíková, and Elena Slávíková The adaptability of the methylotrophic yeast *Candida boidinii* on media containing pectic substances 116

Emma Frändberg and Johan Schnürer Antifungal activity of chitinolytic bacteria isolated from airtight stored cereal grain 121

Susanne Douglas Effects of alkaline earth metal ions on the growth of *Calothrix* strain RC3, a natural isolate from Rock Creek, British Columbia 128

Hugo Ramírez-Saad, Jaap D. Janse, and Antoon D.L. Akkermans Root nodules of *Ceanothus caeruleus* contain both the N_2-fixing *Frankia* endophyte and a phylogenetically related Nod^-/Fix^- actinomycete 140

Yu-Tien Liu, Der-Chiang Chao, Fan Lee, Chia-Geun Chen, and Dar-Der Ji Molecular characterization of *Gluconobacter oxydans recA* gene and its inhibitory effect on the function of the host wild-type *recA* gene 149

Isabelle Poilane, Tuomo Karjalainen, Marie-Claude Barc, Pierre Bourlioux, and Anne Collignon Protease activity of *Clostridium difficile* strains 157

A.V. Sturz, B.R. Christie, and B.G. Matheson Associations of bacterial endophyte populations from red clover and potato crops with potential for beneficial allelopathy 162

Yoav Bashan *Azospirillum* plant growth-promoting strains are nonpathogenic on tomato, pepper, cotton, and wheat 168

NOTES

Vanya Miteva, Anna Gancheva, Vladislav Mitev, and Marin Ljubenov Comparative genome analysis of *Bacillus sphaericus* by ribotyping, M13 hybridization, and M13 polymerase chain reaction fingerprinting 175

A. Fesefeldt, K. Kloos, H. Bothe, H. Lemmer, and C.G. Gliesche Distribution of denitrification and nitrogen fixation genes in *Hyphomicrobium* spp. and other budding bacteria 181

Papiya Choudhury and Ranajit Kumar Multidrug- and metal-resistant strains of *Klebsiella pneumoniae* isolated from *Penaeus monodon* of the coastal waters of deltaic Sundarban 186

F. Quignon, C. Gantzer, L. Kiéné, and L. Schwartzbrod Potentiation of the virucidal activity of sterilized natural waters 190

Per Bruheim and Kjell Eimhjellen Chemically emulsified crude oil as substrate for bacterial oxidation: differences in species response 195

March / mars

REVIEW / SYNTHÈSE

Carlo A. Fallone, Alan N. Barkun, Markus U. Göttke, and Robin N. Beech A review of the possible bacterial determinants of clinical outcome in *Helicobacter pylori* infection 201

ARTICLES

Petra M. Becker, Helmut Wand, Günter G.S. Martius, Erika Weiβbrodt, and Ulrich Stottmeister Functional and structural successions in arbitrary samples of heterotrophic bacteria during aerobic treatments of lignite-carbonization wastewater in *in situ* enclosures 211

C. Campion, B. Vian, M. Nicole, and F. Rouxel A comparative study of carrot root tissue colonization and cell wall degradation by *Pythium violae* and *Pythium ultimum*, two pathogens responsible for cavity spot 221

Walid Naffaa, Catherine Ravel, and Jean-Jacques Guillaumin Nutritional requirements for growth of fungal endophytes of grasses 231

S. Arino, R. Marchal, and J.-P. Vandecasteele Production of new extracellular glycolipids by a strain of *Cellulomonas cellulans* (*Oerskovia xanthineolytica*) and their structural characterization 238

Lori L. Graham and K.L. MacDonald The *Campylobacter fetus* S layer is not essential for initial interaction with HEp-2 cells 244

Lisa D. Noble and John A. Gow The effect of suspending solution supplemented with marine cations on the oxidation of Biolog GN MicroPlate™ substrates by *Vibrionaceae* bacteria 251

L.B. Selinger, G.G. Khachatourians, J.R. Byers, and M.F. Hynes Expression of a *Bacillus thuringiensis* δ-endotoxin gene by *Bacillus pumilus* 259

T.M. April, S.P. Abbott, J.M. Foght, and R.S. Currah Degradation of hydrocarbons in crude oil by the ascomycete *Pseudallescheria boydii* (Microascaceae) 270

Marc-André Lachance, Carlos A. Rosa, William T. Starmer, Birgit Schlag-Edler, J. Stuart F. Barker, and Jane M. Bowles *Metschnikowia continentalis* var. *borealis*, *Metschnikowia continentalis* var. *continentalis*, and *Metschnikowia hibisci*, new heterothallic haploid yeasts from ephemeral flowers and associated insects 279

Stefania Frassinetti, Leonardo Setti, Andrea Corti, Paolo Farrinelli, Piercarlo Montevecchi, and Giovanni Vallini Biodegradation of dibenzothiophene by a nodulating isolate of *Rhizobium meliloti* 289

NOTES

Charlotte Arnal, Virginie Ferré-Aubineau, Bernard Besse, and Sylviane Billaudel Simplified reverse transcription polymerase chain reaction procedure with detection by microplate hybridization for routine screening of hepatitis A virus 298

James Ng, Lai-King Ng, Denis Mayrand, and Jo-Anne R. Dillon Aminopeptidase activities in *Peptostreptococcus* spp. are statistically correlated to gelatin hydrolysis 303

Frank Schweizer, Hailong Jiao, Ole Hindsgaul, Wah Y. Wong, and Randall T. Irvin Interaction between the pili of *Pseudomonas aeruginosa* PAK and its carbohydrate receptor β-D-GalNAc(1→4)β-D-Gal analogs 307

RETRACTION / RÉTRACTION

Graeme T. Attwood, Felicitas Herrera, Lee A. Weissenstein, and Bryan A. White Retraction: An endo-β-1,4-glucanase gene (*celA*) from the rumen anaerobe *Ruminococcus albus* 8: cloning, sequencing, and transcriptional analysis 312

April / avril

REVIEW / SYNTHÈSE

Dan R. Wilson and B. Brett Finlay Phage display: applications, innovations, and issues in phage and host biology 313

ARTICLES

Harald Bredholt, Kjell Josefsen, Arild Vatland, Per Bruheim, and Kjell Eimhjellen Emulsification of crude oil by an alkane-oxidizing *Rhodococcus* species isolated from seawater 330

Claudia Gross and Kenneth Watson Transcriptional and translational regulation of major heat shock proteins and patterns of trehalose mobilization during hyperthermic recovery in repressed and derepressed *Saccharomyces cerevisiae* 341

M. Alex Smith and Michael J. Bidochka Bacterial fitness and plasmid loss: the importance of culture conditions and plasmid size 351

N. Harnett, S. McLeod, Y. AuYong, J. Wan, S. Alexander, R. Khakhria, and C. Krishnan Molecular characterization of multiresistant strains of *Salmonella typhi* from South Asia isolated in Ontario, Canada 356

Latha Thomas and Don L. Crawford Cloning of clustered *Streptomyces viridosporus* T7A lignocellulose catabolism genes encoding peroxidase and endoglucanase and their extracellular expression in *Pichia pastoris* 364

NOTES

Rong Mei Wu, Barry Palmer, and Anthony Cole Phenotypic variation and survival of genetically marked *Pseudomonas tolaasii* in mushroom compost 373

Martin Pelchat, Lucille Lacoste, Fu Yang, and Jacques Lapointe Overproduction of the *Bacillus subtilis* glutamyl-tRNA synthetase in its host and its toxicity to *Escherichia coli* 378

Perry E. Olsen, Eve S. Sande, Harold H. Keyser, Paul W. Singleton, and Wendell A. Rice A very rapid enzyme immunoassay for confirmation of rhizobial identity and estimation of cell numbers in fresh broth culture 382

Olubayi Olubayi, Rodulio Caudales, Amy Atkinson, and Carlos A. Neyra Differences in chemical composition between nonflocculated and flocculated *Azospirillum brasilense* Cd 386

Edward J. Bottone, Nimesh Nagarsheth, and Kenneth Chiu Evidence of self-inhibition by filamentous fungi accounts for unidirectional hyphal growth in colonies 390

Jin W. Lee and Day F. Day The separation of alginate biosynthesis and acetylation in *Pseudomonas syringae* 394

Ralf Wilhelm, Olaf Heller, Manuela Bohland, Cordula Tomaschewski, Inge Klein, Peter Klauth, Wolfgang Tappe, Joost Groeneweg, Carl Johannes Soeder, Paul Jansen, and Wolfgang Mey Biometric analysis of physiologically structured pure bacterial cultures recovering from starvation 399

May / mai

ARTICLES

Umesh K. Bageshwar, Ramesh Raina, Nirupam Roy Choudhury, and H.K. Das Analysis of upstream activation of the *vnfH* promoter of *Azotobacter vinelandii* 405

Edgardo Jofré, Sonia Fischer, Viviana Rivarola, Héctor Balegno, and Gladys Mori Saline stress affects the attachment of *Azospirillum brasilense* Cd to maize and wheat roots 416

Mi Young Ahn, Kuk Hyun Shin, Dong-Hyun Kim, Eun-Ah Jung, Toshihiko Toida, Robert J. Linhardt, and Yeong Shik Kim Characterization of a *Bacteroides* species from human intestine that degrades glycosaminoglycans 423

Rafael A. Garduño, Frederick D. Quinn, and Paul S. Hoffman HeLa cells as a model to study the invasiveness and biology of *Legionella pneumophila* 430

Zhi-Hong Zhao, Yoshikazu Sakagami, and Tetsuya Osaka Toxicity of hydrogen peroxide produced by electroplated coatings to pathogenic bacteria 441

Luc R. Bérubé, Hervé Jouishomme, and Harold C. Jarrell The nonrandom binding distribution of *Streptococcus pneumoniae* to type II pneumocytes in culture is dependent on the relative distribution of cells among the phases of the cell cycle 448

James E. Stewart, L.J. Marks, M.W. Gilgan, E. Pfeiffer, and B.M. Zwicker Microbial utilization of the neurotoxin domoic acid: blue mussels (*Mytilus edulis*) and soft shell clams (*Mya arenaria*) as sources of the microorganisms 456

Alfredo Palop, Glenn C. Rutherford, and Robert E. Marquis Inactivation of enzymes within spores of *Bacillus megaterium* ATCC 19213 by hydroperoxides 465

Stina Petersson and Johan Schnürer *Pichia anomala* as a biocontrol agent of *Penicillium roqueforti* in high-moisture wheat, rye, barley, and oats stored under airtight conditions 471

NOTES

S. Minka et M. Bruneteau Isolement et caractérisation chimique des lipopolysaccharides de type R dans une souche hypovirulente de *Yersinia pestis* 477

Michelle Leander, Tatiana Vallaeys, and Roberta Fulthorpe Amplification of putative chlorocatechol dioxygenase gene fragments from α- and β-*Proteobacteria* 482

Marisa V. de Queiroz, Andréa O. Barros, Everaldo G. de Barros, Walter V. Guimarães, and Elza F. de Araújo Transformation of *Penicillium griseoroseum* nitrate reductase mutant with the *nia* gene from *Fusarium oxysporum* 487

Gopa Sarma, Arnab Sen, Rajani Varghese, and Arvind K. Misra A novel technique for isolation of *Frankia* and generation of single-spore cultures 490

William Brandani da Silva and Rosane Marina Peralta Purification and characterization of a thermostable glucoamylase from *Aspergillus fumigatus* 493

June / juin

ARTICLES

Sari Timonen, Kirsten S. Jørgensen, Kielo Haahtela, and Robin Sen Bacterial community structure at defined locations of *Pinus sylvestris* – *Suillus bovinus* and *Pinus sylvestris* – *Paxillus involutus* mycorrhizospheres in dry pine forest humus and nursery peat 499

A.J. De Lucca, J.M. Bland, C. Grimm, T.J. Jacks, J.W. Cary, J.M. Jaynes, T.E. Cleveland, and T.J. Walsh Fungicidal properties, sterol binding, and proteolytic resistance of the synthetic peptide D4E1 514

Ninef Zaya, Alexandra Roginsky, Jamila Williams, and Domenic Castignetti Evidence that a deferrioxamine B degrading enzyme is a serine protease 521

V.K. Sharma and J. Nowak Enhancement of verticillium wilt resistance in tomato transplants by in vitro co-culture of seedlings with a plant growth promoting rhizobacterium (*Pseudomonas* sp. strain PsJN) 528

Nathalie Fortin, Roberta R. Fulthorpe, D. Grant Allen, and Charles W. Greer Molecular analysis of bacterial isolates and total community DNA from kraft pulp mill effluent treatment systems 537

M. Soledade C. Pedras and Corinne J. Biesenthal Production of the host-selective phytotoxin phomalide by isolates of *Leptosphaeria maculans* and its correlation with sirodesmin PL production 547

Laura B. Willis and Graham C. Walker The *phbC* (poly-β-hydroxybutyrate synthase) gene of *Rhizobium* (*Sinorhizobium*) *meliloti* and characterization of *phbC* mutants 554

Jesús Ramírez-Santos and M. Carmen Gómez-Eichelmann Identification of σ^{32}-like factors and *ftsX–rpoH* gene arrangements in enteric bacteria 565

János Varga, Edit Rinyu, Éva Kevei, Beáta Tóth, and Zofia Kozakiewicz Double-stranded RNA mycoviruses in species of *Aspergillus* sections *Circumdati* and *Fumigati* 569

Kent Nilsson and Jonny Bjurman Chitin as an indicator of the biomass of two wood-decay fungi in relation to temperature, incubation time, and media composition 575

Karen G. Ballen, Peter H. Graham, Roger K. Jones, and John H. Bowers Acidity and calcium interaction affecting cell envelope stability in *Rhizobium* 582

Trevor Lawley and Colin Bell Kinetic analyses of Biolog community profiles to detect changes in inoculum density and species diversity of river bacterial communities 588

Kelly A. Reynolds, Kimberly Roll, Roger S. Fujioka, Charles P. Gerba, and Ian L. Pepper Incidence of enteroviruses in Mamala Bay, Hawaii using cell culture and direct PCR methodologies 598

July / juillet

REVIEW / SYNTHÈSE

Kevin G. Kropp and Phillip M. Fedorak A review of the occurrence, toxicity, and biodegradation of condensed thiophenes found in petroleum 605

ARTICLES

J.R. Lawrence and R.A. Snyder Feeding behaviour and grazing impacts of a *Euplotes* sp. on attached bacteria 623

K. Ikeda, K. Toyota, and M. Kimura Effects of bacterial colonization of tomato roots on subsequent colonization by *Pseudomonas fluorescens* MelRC2Rif 630

Wung Yang Shieh and Wen Dar Jean *Alterococcus agarolyticus*, gen.nov., sp.nov., a halophilic thermophilic bacterium capable of agar degradation 637

N. Mathivanan, V. Kabilan, and K. Murugesan Purification, characterization, and antifungal activity of chitinase from *Fusarium chlamydosporum*, a mycoparasite to groundnut rust, *Puccinia arachidis* 646

Zhaosheng Lin and Richard Sparling Investigation of serine hydroxymethyltransferase in methanogens 652

Phillip Aldridge, Frank Bernhard, Peter Bugert, David L. Coplin, and Klaus Geider Characterization of a gene locus from *Erwinia amylovora* with regulatory functions in exopolysaccharide synthesis of *Erwinia* spp. 657

Vandana M. Saboo and Michael A. Gealt Gene sequences of the *pcpB* gene of pentachlorophenol-degrading *Sphingomonas chlorophenolica* found in nondegrading bacteria 667

Orly Ardon, Zohar Kerem, and Yitzhak Hadar Enhancement of lignin degradation and laccase activity in *Pleurotus ostreatus* by cotton stalk extract 676

NOTES

Urmi Bajpai, R.C. Kuhad, and Sunil Khanna Mineralization of [^{14}C]octadecane by *Acinetobacter calcoaceticus* S19 681

Brian Hall, Jennifer Baldwin, Ho Gun Rhie, and Douglas Dennis Cloning of the *Nocardia corallina* polyhydroxyalkanoate synthase gene and production of poly-(3-hydroxybutyrate-*co*-3-hydroxyhexanoate) and poly-(3-hydroxyvalerate-*co*-3-hydroxyheptanoate) 687

Eliana Rodríguez and Magela Laviña Genetic analysis of microcin H47 immunity 692

Linda Abraham, Brad Hoffman, Yong Gao, and Colette Breuil Action of *Ophiostoma piceae* proteinase and lipase on wood nutrients 698

Eric Weaver and Gary M. Aron Synergistic anti-Newcastle disease virus activity of pokeweed antiviral protein, ribavirin, and guanidine 702

August / août

MINIREVIEW / MINI-SYNTHÈSE

Peter C. Loewen, Bei Hu, Jeanna Strutinsky, and Richard Sparling Regulation in the *rpoS* regulon of *Escherichia coli* 707

ARTICLES

Marc-André Lachance, Carlos A. Rosa, William T. Starmer, and Jane M. Bowles *Candida ipomoeae*, a new yeast species related to large-spored *Metschnikowia* species 718

Geneviève Mével and Daniel Prieur Thermophilic heterotrophic nitrifiers isolated from Mid-Atlantic Ridge deep-sea hydrothermal vents 723

Mercè Casellas, Magdalena Grifoll, Jordi Sabaté, and Anna Maria Solanas Isolation and characterization of a 9-fluorenone-degrading bacterial strain and its role in synergistic degradation of fluorene by a consortium 734

Michael D. Aitken, William T. Stringfellow, Robert D. Nagel, Chikoma Kazunga, and Shu-Hwa Chen Characteristics of phenanthrene-degrading bacteria isolated from soils contaminated with polycyclic aromatic hydrocarbons 743

Martha E. Ramirez, Daniel W. Israel, and Arthur G. Wollum II Using spontaneous antibiotic-resistant mutants to assess competitiveness of bradyrhizobial inoculants for nodulation of soybean 753

Monica Chander, Barbara Setlow, and Peter Setlow The enzymatic activity of phosphoglycerate mutase from gram-positive endospore-forming bacteria requires Mn^{2+} and is pH sensitive 759

Linda L. Kinkel, John H. Bowers, Kyoko Shimizu, Eric C. Neeno-Eckwall, and Janet L. Schottel Quantitative relationships among thaxtomin A production, potato scab severity, and fatty acid composition in *Streptomyces* 768

B.M. Sharga and G.D. Lyon *Bacillus subtilis* BS 107 as an antagonist of potato blackleg and soft rot bacteria 777

NOTES

Min Jiang, P. Ronald MacLachlan, Lorne A. Babiuk, Alexandra J. Bolton, and Andrew A. Potter The *abp* locus of *Streptococcus uberis* encodes a protein homologous to polar amino acid and opine binding proteins of Gram-negative bacteria 784

Takashi Yamasaki, Yuka Miyazaki, and Yuto Kamei Isolation of bacteria that decompose major polysaccharides in the cell wall of the marine red alga *Porphyra yezoensis* and their application for protoplast production 789

Cécile Revellin, Jean-Baptiste Denis, and Gérard Catroux Sampling to determine nodule occupancy of soybean (*Glycine max* (L) Merr.) by *Bradyrhizobium japonicum* strains 795

J. Wayne Conlan and Malcolm B. Perry Susceptibility of three strains of conventional adult mice to intestinal colonization by an isolate of *Escherichia coli* O157:H7 800

V.K. Sharma and J. Nowak Erratum: Enhancement of verticillium wilt resistance in tomato transplants by in vitro co-culture of seedlings with a plant growth promoting rhizobacterium (*Pseudomonas* sp. strain PsJN) 806

September / septembre

ARTICLES

Mohamed Nour Studies on the large subunit rRNA genes and their flanking regions of leuconostocs 807

Elizabeth M.R. Rees, David Lloyd, and Alan G. Williams The effects of differing concentrations of CO_2 and O_2 on the fermentative metabolism of the rumen fungi *Neocallimastix patriciarum* and *Neocallimastix frontalis* L2 819

J.R. Lawrence, G.D.W. Swerhone, and Y.T.J. Kwong Natural attenuation of aqueous metal contamination by an algal mat 825

Salehuzzaman Shah, Jiping Li, Barbara A. Moffatt, and Bernard R. Glick Isolation and characterization of ACC deaminase genes from two different plant growth-promoting rhizobacteria 833

S.D. Siciliano, C.M. Theoret, J.R. de Freitas, P.J. Hucl, and J.J. Germida Differences in the microbial communities associated with the roots of different cultivars of canola and wheat 844

Debra Baer, Alan R. White, and Neil C. Gudmestad Partial characterization of an extracellular β-fructofuranosidase from *Clavibacter michiganensis* subspecies *sepedonicus* 852

Gregor Reid, Foaud Soboh, Andrew W. Bruce, and Marc Mittelman Effect of nutrient composition on the in vitro growth of urogenital lactobacilli and uropathogens 866

Anand Sethuraman, Danny E. Akin, Jason G. Eisele, and Karl-Erik L. Eriksson Effect of aromatic compounds on growth and ligninolytic enzyme production of two white rot fungi *Ceriporiopsis subvermispora* and *Cyathus stercoreus* 872

L.V. Lopez-Llorca and T. Carbonell Use of almond mesocarp for production of the entomopathogenic fungus *Verticillium lecanii* 886

R.K. Latta, M.J. Schur, D.L. Tolson, and E. Altman The effect of growth conditions on in vitro adherence, invasion, and NAF expression by *Proteus mirabilis* 7570 896

NOTES

A.A. Odenyo and P.O. Osuji Tannin-tolerant ruminal bacteria from East African ruminants 905

David J. Koechlein and Noel R. Krieg Viable but nonculturable coccoid forms of *Prolinoborus fasciculus* (*Aquaspirillum fasciculus*) 910
